

Edwin Sixtos Ruiz

Lafayette, IN | +1 (574) 535-4956 | esixtosr@proton.me | linkedin.com/in/edwin-sixtos-ruiz | github.com/esixtosr

EDUCATION

Purdue University

Bachelor of Science, Cybersecurity & Network Engineering; GPA: 3.3

West Lafayette, IN

Aug. 2023 – Dec. 2026

EXPERIENCE

Cybersecurity Analyst

Aug. 2025 – Present

Sinapsis.tech – Startup

Remote / Part-Time

- Support security governance, risk, and compliance activities, including ISO 27001-aligned policies, evidence tracking, and control documentation.
- Assist with infrastructure security planning covering access control, backup strategy, network segmentation, and secure systems administration practices.

ISO 27001 ISMS Project Lead / Cybersecurity Intern

May 2025 – Aug. 2025

Sinapsis.tech – Startup

Remote

- Led initial ISO/IEC 27001:2022 ISMS buildout, creating governance documentation, policy templates, risk assessment structure, and control mapping.
- Built foundational GRC artifacts including risk register, Statement of Applicability support, security awareness materials, and audit evidence organization.

Teaching Assistant – System Administration

Jan. 2024 – Present

Purdue University – Polytechnic Institute

West Lafayette, IN

- Mentor students in Linux, Windows Server, Active Directory, Group Policy, virtualization, and enterprise systems administration labs.
- Support Nutanix HCI and virtualized lab environments while reinforcing troubleshooting, documentation, and security fundamentals.

IT / Network Technician – Summer Intern

Summers 2024 – 2026

Purdue University – Polytechnic Institute

West Lafayette, IN

- Installed and maintained classroom and lab network infrastructure, including Cat6/Cat6A cabling, keystone termination, switches, routers, and wireless access points.
- Configured and updated network equipment, servers, workstations, and lab systems supporting instructional, research, and administrative environments.

PROJECTS

Enterprise SIEM & Detection Engineering – Wazuh/ELK

Jan. 2025 – Present

- Deployed a centralized SIEM lab using Wazuh, Linux, Windows Server, Active Directory, and virtualized endpoints to collect and analyze security events.
- Created and tuned detection workflows for brute-force activity, suspicious authentication behavior, and endpoint security events in a segmented lab environment.

12U Virtualization & Segmented Infrastructure Homelab

Dec. 2025 – Present

- Built a compact 12U infrastructure lab using Proxmox VE, ZFS storage, Windows Server, TrueNAS, VLAN segmentation, and centralized services.
- Designed segmented lab networks to support systems administration, SIEM testing, firewall configuration, backup planning, and cybersecurity portfolio projects.

TECHNICAL SKILLS

Infrastructure & Systems: Linux, Windows Server, Proxmox VE, Nutanix HCI, TrueNAS, ZFS, Active Directory, GPOs

Networking & Security: VLANs, pfSense, DNS/DHCP, Wazuh, ELK Stack, Wireshark, Kali Linux, Cat6/Cat6A, Switches, Routers, Wireless APs

Governance & Risk: ISO 27001, Risk Assessment, Control Mapping, Policy Development, Security Awareness, Evidence Tracking

CERTIFICATIONS

Google Cybersecurity Professional | CompTIA Security+ (Planned 2026) | Cisco CCNA (Planned 2026)
